Getting started

The temperature control button is located on the front, right hand side of the handle.

Temperature control
Three temperature settings including constant cold.

The airflow control button is located on the front, left hand side of the handle. It is a slider button that pushes upwards and downwards.

Airflow control
3 airflow speeds.

i.d.curl

The LED lights are located at the bottom of the handle above the filter cage.

The power button is located in the middle of the handle. It is a slider button that pushes upwards and downwards.

Power on/off
Sliding switch
i.d. curl™ personalized curling sequence
Complete the tutorial in the MyDyson™ app to unlock this feature. Slide up and release to activate.

FILTRE

LED
Flashing blue – ready to connect.

Constant blue – connected.

Clean the filter. See the 'Regular filter maintenance' section for details.

If the red LED lights, and the filter has already been cleaned, contact the Dyson Helpline.

Removable filter cage
Easy to remove for cleaning (see the 'Regular filter maintenance' section for details).

The filter cage is located at the bottom of the handle.

Unlock i.d. curl™ personalized curling sequence by connecting to the MyDyson™ app

Download on the App Store. Get it on Google Play.

Step 1
Download the MyDyson™ app and create your account.
If you already have an account, log in.

Step 2
Power on your Dyson Airwrap i.d.™ multi-styler and dryer
and add machine to the app.
Bluetooth® wireless technology must be enabled on your mobile device.

Step 3
Follow the steps to pair your Airwrap i.d.™.
Airflow will be active during this time.

Step 4
Once paired, power off your Airwrap i.d.™.
Continue set-up in the app to enable features such as the i.d. curl™
personalized curling sequence.

Logos of MyDyson app,
App store and Google Play.

Using your attachments

Connecting the attachment
Turn attachment into the main body until it fits securely.

Lower the attachment onto the multi-styler's main body and turn gently clockwise until it locks into place.

Changing attachments
To change attachment, pull down on the switch to release.

Lower the new attachment onto the multi-styler's main body and turn gently clockwise until it locks into place.

Pull down on the release switch located at the head of the main body and lift the current attachment away.
Cool touch tip
During use, the Dyson Airwrap™ barrels, round brushes and Dryer+Flyaway smoother will get hot. To change to another attachment, hold the tip.

Hold onto the rotating cool tip at the top end of the attachment, pull down on the release switch and lift the attachment away.

Take care when handling hot attachments
Hold the attachment only in the area indicated. Some attachments may need occasional cleaning.

Dryer+Flyaway smoother

Conical Airwrap™ barrel

Round volumizing brush
Pre-styling

For straight and wavy hair, use a dryer attachment –
Fast dryer or Dryer+Flyaway smoother.

The Dryer+Flyaway smoother has two modes (i) drying and
(ii) smoothing. Use the cool tip to switch between the modes.

Hair should look dry but feel cold to the touch before
curling with barrels.

For curly and coily hair, use the Firm smoothing brush.
Brush hair downwards in small sections, starting from the ends
and working towards the roots, until slightly damp to touch.
A person moving the device with the Coanda smoothing dryer attachment down their hair to hide flyaways.

A person holding the device with the Coanda smoothing dryer attachment above their head, with airflow blowing their long, straight hair.
Curling

Using i.d. curl™ sequence
The Dyson Airwrap i.d.™ multi-styler and dryer remembers your
personalized i.d. curl™ sequence. This tailors wrapping and styling
times to your personal hair profile, using the MyDyson™ app.

Slide up and release the power switch to activate i.d. curl™
sequence, following initial app set-up.

A person holding a section of hair, bringing it towards the barrel until it starts to wrap, whilst holding the Dyson device vertically.

Barrels
Step 1
Take a section of hair and bring barrel towards tips.
Hair will start to wrap around barrel.

A person moving the device towards their head, allowing more hair to wrap and hold around the barrel.

Step 2
Move styler towards head, no need to twist.
Your personalized i.d. curl™ sequence will run.

Step 3
Cold shot will automatically activate to set the curl.
Airflow will automatically reduce when sequence is complete.

Move device downwards to release.

To change curl direction, rotate the barrel's cool tip.

clik
Twist the rotating cool tip to change curl direction.

Shaping

Smoothing brushes
Use Smoothing brush to brush from root to tip.

Tip:
For volume, face bristles outwards.
Turn brush inwards at the ends to create shape.

A person using the Smoothing brush attachment with bristles facing inwards and running along the length of rough-dried hair.

The Smoothing brush with bristles facing outwards combing hair near the tips. As the brush reaches the hair tips, the attachment is turned inwards to help create shape.
Volumizing

Round volumizing brush
The Round volumizing brush has long fine bristles to direct air into the hair whilst giving body, creating tension to shape the hair as it dries.
A person with long hair using both hands to curl and shape a section of hair using the Round volumizing brush attachment.
Tip
Lift sections upwards as you dry to add volume.
Wrap hair around and under the brush to shape the ends

The Round volumizing brush with a length of hair over the top of it and to an angle as it brushes from root to tip.

The Round volumizing brush showing the hair curled around shaping the ends.

Smoothing

Dryer+Flyaway smoother
Rotate cool tip to select Smoothing mode.
Press against hair to switch airflow direction.

On the side of the
Dryer+Flyaway smoother,
twist the rotating cool tip to
select Smoothing mode.
Run the attachment
downwards to the hair tips.

clik
Use on dry hair to hide flyaways.
Position against hair until it attracts then slowly run down to tips.

For use on dry and straight hair.

A person using the Dryer
and Flyaway smoother on
dry, straight hair, moving
the attachment along roots
to tips of hair.

How to use the contact bar
Position contact bar against the head until you hear a click
and hair attracts. Run from root to tip to hide flyaways.
Regular filter maintenance

Filter cleaning is overdue when the white LED starts flashing.

Ensure that you unplug your appliance from the mains electricity supply and allow to cool down before cleaning your filter.

The Dyson Airwrap i.d.™ multi-styler and dryer has highly tuned technology to give outstanding performance.

This technology needs to be kept free from dust and hair product residue. Maintenance is required to maintain performance.
Filter mesh
Filter cleaning brush

Filter cage

Step 1
Slide the filter cleaning brush over the cable and onto the filter cage.

Using a rotating action, clean the filter cage thoroughly.

Remove the filter cleaning brush.

Slide the filter brush onto the filter cage and rotate from side to side and upwards and downwards to clean the filter cage.
Step 2
Hold the handle of your appliance and pull the filter cage downwards, onto the cable.

Gently pull open the filter cage and slide it off the cable.

Gently pull the filter cage downwards towards the cable. Open the filter cage and remove.

Step 3
Wash the filter cage under a warm, running tap.
Wash the filter cage under the tap.

Step 4

Shake the filter cage to remove the majority of the excess water, then leave to dry naturally.

A person shaking the excess water from the filter cage.

Step 5

Using a rotating and up and down action, clean the filter mesh with the filter cleaning brush until all the debris has been removed.

Do not use water or chemicals to clean the filter mesh.

Rotate the filter brush from side to side and upwards and downwards around filter mesh to clean.

Slide the filter brush towards the filter.

Step 6

Gently pull the filter cage open and slide it onto the cable.

Slide the filter cage towards the handle and twist until it snaps into place.

clik

Gently open the filter cage and slide the cage towards the handle, twist until it snaps into place.
